RETAIL CATALOG VOLUME SEVENTEEN 2011-2012

-NEW FOR 2012-

For 2012 we have expanded the BVK series to include 9'6" and 10' versions as well as some 5-piece rods for the travelling angler. Two handed enthusiasts will love the new Pandion Series designed by two handed expert Nick Curcione. These powerful rods will handle everything from overhead to skagit casting with ease. Also, Bob Meiser and Mike Kinney have added three new rods to the Deer Creek family of spey rods, and our new BVK Fly Reels are not only the perfect match to the super light-weight BVK rods, but are powerful enough to tackle everything from rainbows to roosterfish.

for 2012

BVK

"A finely tuned instrument, lightweight and highly responsive."

That's what experts are saying about our new BVK series of fly rods. Engineered to the highest performance standards, the BVK utilizes new materials that dramatically reduce weight while creating an aggressive blend of power and strength. The result is amazing performance and an incredible price. BVK rods are fast action rods designed to excel in Presentation and Distance. The rich translucent olive blanks are topped with matching braided carbon fiber reel seats, our exclusive Tactical Series Stripping Guides, ultra lightweight chromium-impregnated stainless snake guides, and for grade cork grips that are comfortably contoured and uniquely contrasted. The new 3-weight Conversion Kit changes your 8' 3-weight BVK into a 10' Czech nymph / dry fly rod for the ultimate in on-stream versatility.

"I've dedicated the past year to designing the BVK rods, they are everything I hoped for. You can't beat the performance, and you sure can't beat the price."

Lefty Kreh

"Working with Lefty on the design of the BVK Family of rods has taught me all that I never knew about rod design. What has been such a treat for me is bound to become the same for BVK owners! Grab one and see how much trouble you can get into!"

Professional Series II

NEW for 2012

With 20 models available, from a delicate 2 weight to our popular 10 weight, the Professional Series II travel rods have taken TFO's reputation to new levels. With new components and cosmetic upgrades for 2012, the Professional Series II rods are an outstanding value. These medium fast action rods with a progressive taper are smooth casting and powerful, yet forgiving. Lefty says these are the perfect rods for all anglers and all skill levels.

Cosmetics include matte black finished blanks with a subtle gold logo. Every rod features alignment dots color coded by line weight, premium grade cork with burlled accents, and oversized stripping guides. New anodized aluminum reel seats with braided carbon fiber inserts make these rods as forgiving on the eyes as they are in the hand.

"I can't imagine a better buy in a four-piece rod that will deliver such a fast, smooth cast."

Finesse Series

"Lefty Kreh Finesse rods complement the TFO line by offering a more traditional taper and action for those who fish small flies and fine tippets on light lines. These are ideal rods for meadow streams, limestone creeks, and springcreeks. TFO tailored these rods for smooth, accurate and delicate presentations and they roll cast like a dream. Lefty Kreh Finesse rods are handsomely appointed with Rosewood inserts on an up locking reel seat which nicely accentuates the deep olive finish."

Axiom Series rods are the quickest responding rods in our line-up. They excel at distance casting, but their unique construction makes them deadly at close range as well. Their breadth of casting range makes them an indispensable addition to every angler's arsenal.

Through a proprietary process, Kevlar is applied within the carbon fiber pre-preg. This patented design reduces the ovaling effect a blank experiences under load, creating an exceptionally smooth and powerful rod with remarkable damping qualities. The result is ultra high line speed with crisp, clean, accurate loops. TFO's Axiom series features a rich translucent blue blank with gold script and accents, Flor grade cork with decorative burl rings, gun metal blue up-locking reel seat and oversized stripping guides with gold titanium oxide inserts.

TiCr X

"WOW!!! This rod throws a line as flat as a billiard table with a loop you can throw through a screen door. I would certainly rate this as one of the very best 8- weight rods I have ever cast. For anyone who likes a fast action rod - this does it in spades."

Lefty Kreh

Temple Fork TiCr X rods are handsomely finished in a rich blue blank color, Flor grade cork and an aluminum reel seat with a cushioned reel hood. Rods equipped with a fighting butt also have a channel lock sliding rear hood with double locking rings and feature full wells grips. Oversized titanium oxide first stripping guides start with a #20 on the 6, 7 and 8 and #24 on the 9-weight through 12-weight. The 4, 5 and 6 (lt) weight have a reversed half wells grip, single up locking ring and a matte black graphite insert. All weights have color coded alignment dots.

Conversion Kit

Imagine a two-handed rod and a 4 piece nine foot rod that will fit in the same length case. TFO now has two lower rod sections designed to replace the single-handed grip section on existing 9' 4-piece 7- and 8-weight TiCr X rods. With a total of six rod sections of equal length you can now have both, a great 9' 4-piece traditional fly rod, and a 5-piece 11'3" two-hander for easy overhead distance casting. TiCr X two-handed conversion sections include a full two-handed grip with Flor grade cork and a heavy-duty knurled reel seat, large titanium oxide stripping guides and a handsome rod sock.

CLOUSER

"For years I have been looking for a multi-species fly rod that puts the ease in casting weighted flies and sinking fly lines. Temple Fork Outfitters answered this challenge by developing the Clouser Series of Fly Rods. Anglers that use weighted flies or split shot should find this series ideal. Dry fly fishers will also benefit from the rods ability to deliver tight loops and specialty casts required to present the fly. Light in the hand and super sensitive.....I can feel them breathing on the fly as they inhale it."

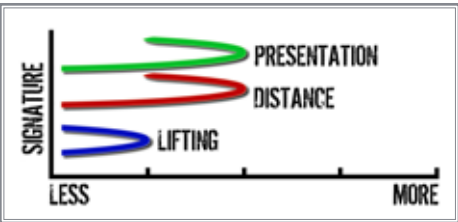

Whether you are casting PMD cripples to rising trout or stalking bonefish on your favorite flat, the Clouser Series will exceed all of your expectations. One glance at the Clouser's narrow profile and you realize that this series was engineered for extreme castability. This design allows the rods to load with ease while permitting precise control over their loop size and presentation. Even more remarkable is the Clouser Series' ability to cast heavily-weighted and wind-resistant flies. Sling your favorite streamers with confidence - no more ducking!

Bob Clouser

Our proprietary use of titanium and chromium removes vibration and significantly reduces impact damage. Clouser rods utilize oversized titanium oxide stripping guides and chromium impregnated stainless steel snake guides. The Clouser Series utilizes Lefty's rod weight designation system and color-coded alignment dots for easy identification and assembly. Flor grade cork and burlwood accent rings finish out the rod, making it attractive and durable as well.

Signature Series II

NEW for 2012

The NEW Signature Series II rods offer the same astounding performance as the classic Signature Series - with upgraded components. This is a perfect first fly rod with performance that will impress even a master fly caster. Signature II rods feature an anodized up-locking aluminum reel seat, AA grade cork with handsome accents, oversized stripping guides and a beautiful translucent green blank finish.

Bluewater

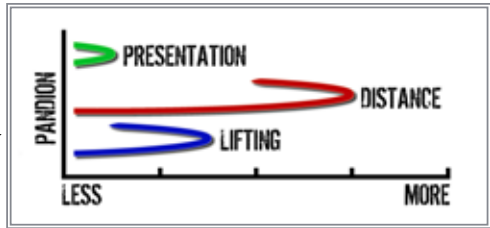

The Bluewater rods use S-Glass for heavy lifting in combination with high modulus carbon fiber for exceptional casting ability. The blank goes through the TiCr coating process twice, adding power and durability. Components include uplocking reel seats, Flor grade cork and a unique blue granite finish. The Baby Blue and Light Duty rods have snake and titanium-oxide stripping guides; the Medium Duty and Heavy Duty rods have ceramic inserts on all guides including the tip tops and a continuous composite cork handle for greater comfort. The Heavy Duty is now a 4 piece rod utilizing a revolutionary new reverse ferrule design.

NEW
for 2012

Pandion Series

TF0 FLY RODS
PANDION SERIES TWO HANDED RODS

Introducing the new Pandion Series two handed rods designed by renowned expert Nick Curcione. The ultimate tool for overhead and skagit casting, the new Pandion Series rods are light in the hand yet extremely powerful, delivering extreme distance with minimal effort. Whether you are launching flies into the surf, or you're knee deep in your favorite steelhead run, these rods let you cover more water - putting your fly in front of fish that you couldn't reach with your single hand rods. Pandion rods are built with our kevlar Axiom technology making them incredibly smooth with remarkable distance and damping qualities.

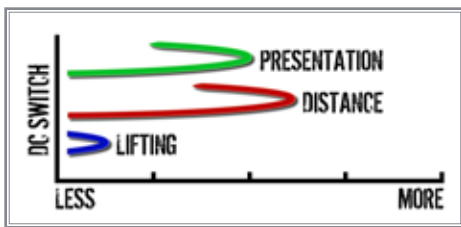

Pandion rods are emerald green with rich blue wraps and highlights and finished with flor grade cork with stylish burlled accents. The rods feature an anodized aluminum reel seat with a matching woven graphite insert. Titanium oxide stripping guides and chromium impregnated snake guides further adorn this handsome blank. Available in 6-, 8-, and 9-weight.

TF 09 139-4 P	9	13' 9"	4	10.1 oz.	700-750	\$349.95

"The Pandion rods enable me to orchestrate the loops and line speed in both overhead and spey style casting that make for some incredible long distance presentations. Fish I couldn't get into before are now in range."

Nick Curcione

DEER CREEK SERIES SWITCH RODS

Two handed rod designers Mike Kinney and Bob Meiser continue to expand the TFO Deer Creek series of fly rods with the introduction of the Deer Creek Switch Rod Series.

Switch Rods are multi-task fly rods specifically designed to allow a variety of both single and two handed caster options. The primary goal of the Switch Rod is to allow the caster the ability to achieve maximum targeted forward distance with the least amount of expended energy.

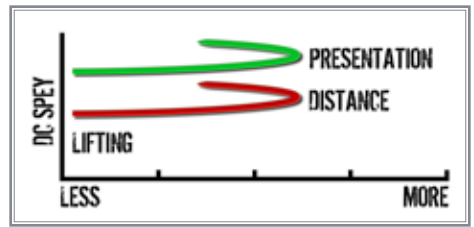

Bob Meiser has been in the forefront of popularizing and refining blank designs for the switch rod concept of fly rods since the mid 1990s. His expertise with this unique family of rods is well established within the two handed rod community. Bob's concept has been universally accepted over the past decade. Teaming with Mike Kinney in design and application for these rods has taken the concept to the next level. We have used our proprietary Axiom material lay-up process for these blanks. These are extremely light weight, durable, thoughtfully designed fly rods with superb performance ... Best defined simply as: "Totally efficient delivery tools."

DEER CREEK SERIES SPEY RODS

*NEW
additions*

While some might argue that properly executed spey casts are the highest form of fly casting, we would probably all agree that these casts are visually compelling, personally gratifying, and a wonderful way to present a fly to a fish. For a collective 65 years, two Pacific Northwest spey casters, Mike Kinney and Bob Meiser, have perfected this art and have shared their knowledge through guiding, teaching, and perhaps most importantly, by designing a new line of spey rods, the Deer Creek Series of two-handed rods.

The Deer Creek Series have casting properties that marry perfectly with modern spey lines. They have a unique progressive-regressive traditional action making them ideal for executing all types of spey and skagit casts. These blanks are a beautiful translucent dark amethyst color with accents and components selected by Bob and Mike.

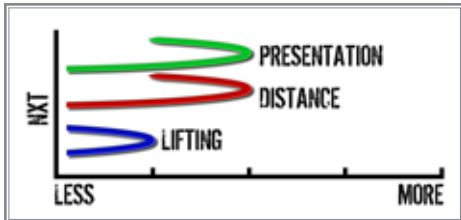

"The TFO Deer Creek rods are the most user-friendly rods I have helped design so far. They are the best rods for the money anywhere in the industry today."

Mike Kinney

NXT Series

NEW
for 2012

NXT rods are what the beginning fly caster should demand from the industry. These high performance fly rods will flatten the learning curve, making it easier and more rewarding to become an active participant in this sport of a lifetime. Now the industry standard, our NXT rods are medium fast with plenty of forgiveness for delicate presentations and cushioning light leaders, but load up easily for longer casts into the wind. The rods are a handsome forest green with a composite cork handle for extreme durability. Titanium oxide stripping guides, chromium-impregnated stainless steel snake guides, and an anodized aluminum reel seat make the NXT family of rods ideal for chasing fish in fresh or saltwater. NXT rods make great gifts for the aspiring fly fisherman and are superb back-up rods for the angler who has everything.

Mix and match the NXT components to create the perfect custom rod and reel outfit for your home water. With six rods and two reels to choose from, there is a combination to suit your every need. Choose the rod that best fits your water and style of fly fishing. Next select the appropriate reel to balance your outfit. As an added option, you can have your reel spooled LH or RH retrieve with backing, a weight forward floating fly line and a leader. Add a rod and reel carrier or TFO rod case to finish out your custom outfit.

NXT REELS AND SPOOLS

The hardworking and affordable NXT reel is finally available a-la-carte. The lightweight cast aluminum frame, adjustable gear-based drag system and interchangeable spools make this reel a necessity for every freshwater angler. Whether you are looking to get started in fly fishing or need a back-up reel for your next big trip, the NXT reels are a great way to expand your tackle selection and stay under budget. Have us spool your reel with WF Floating Line, backing and a tapered leader. Check out our website for a complete backing capacity chart.

Mini Mag

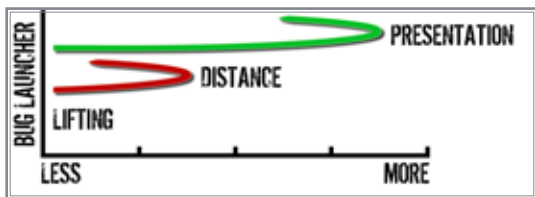

The Mini Mag rods are powerful fishing tools. Their ability to deliver short, accurate casts makes them the perfect rod for tossing hairbugs into the lily pads for bass or flipping streamers under the mangroves for tarpon and snook. The Mini Mag's unique blend of unidirectional S-Glass and high-modulus graphite translates into exceptional lifting power and superb casting ability. The rods also go through our Ti Cr coating process twice adding power and durability.

A polished blue marble finish, up locking reel seat, Flor grade full wells cork grip, and oversized stripping and snake guides make these 3-piece rods a stunning piece of equipment. Create your own Mini Mag Kit by adding a TFO Prism reel (7/8 or 9/11) rigged with a matching weight forward floating fly line, leader and backing and a rod and reel carrying case.

MINI MAG RODS

Model	Line	Length	Pieces	Weight	Grain Weight	Retail

TF MINI 8/10	8-10	8'	3	5.4 oz.	300-400	\$199.95

Bug Launcher

Who inspired you to pick up a fly rod? Chances are it was a parent, your favorite uncle, or a close friend who helped you throw your first tailing loop with great pride. You probably landed your first fish on a hand-me-down rod with a missing guide and a doctored tip. If it is time to pass your knowledge on to others, Temple Fork Outfitters has the perfect rod to hand down. The Bug Launchers are made from general graphite, so they are incredibly durable. They feature smaller diameter compressed cork grips and candy apple blanks with a bright yellow logo. put together a Bug Launcher Kit with a TFO NXT I reel rigged with a matching weight forward floating fly line, and a rod and reel carrying case.

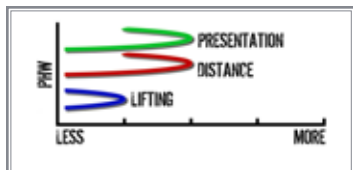

BUG LAUNCHER

CASTING FOR RECOVERY

Through the combined efforts of Wanda Taylor, Donna Teeny and Lefty Kreh, Temple Fork Outfitters has created two unique fly rods built specifically to benefit "Casting for Recovery;" an 8'6" 5-weight and a 9' 8-weight. CFR rods are built on translucent purple blanks with pink lettering inscribed with the words "Supporting Casting For Recovery & Hope" with a distinctive pink rod sock. A \$25 contribution will be made to Casting For Recovery for every CFR rod that is purchased through an authorized TFO dealer.

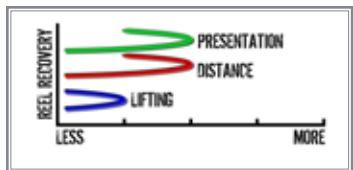

Model	Line	Length	Pieces	Weight	Retail

TF 08 90 4 CFR	8	9'	4	4.4 oz.	\$159.95

Reel Recovery

Reel Recovery is an organization helping men in the cancer recovery process by introducing them to the healing powers of the sport of fly-fishing, while providing a safe, supportive environment to explore their personal experiences of cancer with others who share their stories. TFO is proud to support Reel Recovery by offering a new 9' 5-weight Reel Recovery special edition rod. The rod is translucent moss green finished with the gold Reel Recovery logo. A \$25 contribution will be made to Reel Recovery for every RR rod that is purchased through an authorized TFO dealer.

for 2012

BVK Fly Reels

BVK FLY REELS

While field testing the new BVK Series of fly rods, we realized the need for a high performance fly reel that would not only stand up to the most rigorous fishing conditions, but also complement the exceptionally lightweight BVK rods. Introducing the new BVK fly reel. These reels are machined aluminum and anodized for extreme use in fresh or salt water. The super large arbor design gives these reels a huge line capacity and enables the angler to pick up line with incredible speed. BVK reels have a fantastic sealed Delrin and stainless steel drag system that will stand up to any punishment. The reels are highly ported for additional weight savings and are available in silver, gold or moss green to match your favorite rod. See website for complete backing capacity chart.

Item	Description	MSRP
TFR BVK I	TFO BVK I Large Arbor Reel (3.25" dia., 1.25" w., 4.6 oz.)	\$229.95

TFR BVK III SS	TFO BVK III Spare Spool	\$159.95

*Available in Silver (S), Gold (G), and Moss Green (M)

TFO Large Arbor Reels

TFO LARGE ARBOR REELS

TFO Large Arbor reels are machined from aircraft grade aluminum and offer a state of the art draw bar/carbon fiber disk drag. Three bearings give our reel it's smooth as silk spin, and a one way roller bearing makes it easily convertible from left hand to right hand retrieve. The TFO Large Arbor reels are perfect for both freshwater and hardcore saltwater use. Lightweight and powerful, they are exactly what you want on your rod when you hook that fish of a lifetime. See website for complete backing capacity chart.

ROD →
PERFORMANCE
MATRIX™

Years ago, Lefty Kreh explained his basis for rod design. "There are three things we can emphasize in rod design at TFO.....Presentation, Distance, and Lifting." Presentation involves accuracy and the manner in which the fly and leader land on the water. Delicacy of presentation may not be a major factor when targeting a species like tuna but it can be all important when tempting trout in a gin-clear stream. Distance of course, refers to how far you can deliver your offering. In some situations this may matter little, in others it can spell the difference between success and failure. Finally, in the fish fighting phase, the rod's primary function is related to its lifting power, a critical consideration when a big fish dogs you in the depths.

Of course, no one rod can perform each of these functions to its maximum potential. But at TFO our rod series are designed to handle virtually every kind of fishing scenario you are likely to encounter. By consulting the chart you can easily select a rod that features a mix of functions that is most suitable for the kind of fishing you'll be doing. You won't be disappointed.

NO-FAULT LIFETIME WARRANTY

Our No-Fault Warranty is for the life of the original registered owner. Fill out the on-line registration form at www.templeforkflyrods.com to activate your warranty. In the event that you break your rod, simply return it with \$25 for shipping & handling and we will repair or replace your rod. Be sure to include your return shipping and contact information. Normal rod repairs are completed in 1 business day, so you should be back on the water in no time. This warranty is limited to the blank, on custom TFO rods.
